According to Article 6 of the Double Major Regulations at this university: "Based on the graduation requirements for the academic year of approved study," please refer to the courses listed for that academic year's graduation requirements in our department, and confirm with the department office one year before graduation whether you meet the criteria. If no confirmation is made, resulting in ineligibility for graduation, you will be responsible for the consequences.

According to university regulations, required course credits must be fulfilled. For students pursuing a double major with less than 40 credits or a minor with less than 20 credits, elective credits may be taken. If unsure about these regulations, please confirm with the Department of Finance office!

Courses counting towards a minor (20 credits) or double major (40 credits) in this department must have a course code of U21, which are courses offered by the Department of Finance. Exceptions include only "College Courses" or professional electives recognized by the department from other departments.
